

BARON

CHAMPIONSHIP RINGS

OFFICIAL CHAMPIONSHIP RING SUPPLIER TO THE ACHA

WHY CHOOSE BARON?

Baron realizes that a championship ring carries memories and is a priceless keepsake. This is why we take pride in making sure the craftsmanship of our ring is to the highest standards.

Our new 3D modeling artwork shows an actual representation of the ring instead of the old school 2D artwork that doesn't clearly represent how the finished ring will look. The 3D artwork helps your team know exactly what their finished ring will look like. Baron is the only company in the industry that provides this presentation format. Baron also offers a high end video presentation of your final ring design for use at your ring ceremony or can be put on the team website.

A championship ring specialist works in-house and will satisfy all your needs. The ring specialist is steps away from the production of your ring and can answer any questions or make changes to your order right away. Other companies do not offer this as they use sales reps which in turn must deal with 2 or 3 more people before they know the status of your order. Baron will also assign your team an account manager. This person is dedicated to making sure that if a member of the your team needs any re-sizing, refinishing, stone replacement or any other lifetime warranty repair done to the ring, that it gets done with ease and back to the customer in a appropriate time. With other companies you will see the ring representative at the time of sizing and 3 months later when the rings are delivered.

Baron provides consistent experience throughout the production process which makes the time go by faster until delivery.

WHAT METAL TO CHOOSE?

DURILIUM - Durilium is the finest non-precious metal ever developed. It has a rich platinum-white silver finish, resists scratches, won't tarnish, and has strong durability. **MOST POPULAR**

STERILIUM - Sterilium is Premium Sterling Silver. It has a vibrant bright white color and is tarnish resistant. Sterilium has improved hardness over regular Sterling Silver that provides a high lustre finish.

STERILIUM PLUS - Sterilium Plus is one of the hardest precious metals. It is a mixture of Sterilium and Platinum. It is as hard and durable as gold.

TWO-TONE - This is real gold that can be supplemented in for the logo and/or wording on the top the ring to give a gold/silver looks to the ring. It will also increase the overall physical value of the ring.

4KT and 6KT GOLD - 4kt and 6kt is the most popular gold in the industry. It is affordable and more durable than 10kt. The added Palladium gives it strength and has the lustre and brilliance of 10kt and 14kt gold.

10KT GOLD - 10kt is 41.6% pure gold. It is a very strong and durable metal that is very valuable.

14KT GOLD - 14kt is 58% pure gold. It's strong and durable, has definition and more pleasing color. 10kt is stronger than 14kt gold.
